- A. Homeless Veteran Estimates
- 1. Point-in-time estimate of Homeless Veterans (from the CHALENG Point of Contact Survey): 150
- 2. Point-in-time estimate of Veterans who are Chronically Homeless: 31

The federal Interagency Council on Homelessness defines chronic homelessness as follows:

A person experiencing chronic homelessness is defined as an unaccompanied individual with a disabling condition who has been continuously homeless for a year or more or has experienced four or more episodes of homelessness over the last three years. A disabling condition is defined as a diagnosable substance abuse disorder, serious mental illness, developmental disability, or chronic physical illness or disability, including the co-occurrence of two or more of these conditions. Federal Register Vol. 70, No. 53, March 21, 2005, page 13588; http://www.hud.gov/offices/adm/grants/nofa05/gensec.pdf)

This veteran chronic homeless estimate is a conservative estimate. The following formula was used to obtain this estimate\*:

150 (point-in-time estimate of homeless veterans in service area)
X 29% (percentage of veterans served who indicate being homeless for a year or more at intake)
X 71% (percentage of veterans served who had a mental health or substance abuse disorder) = 31 (facility veteran chronic homeless estimate).

\*Note: point-in-time estimate of homeless veterans in service area comes from CHALENG POC survey. Percentage of veterans 'homeless 1 year or more' and 'mental health or substance abuse disorder' based on FY 2004 homeless veteran intake data provided by the VA Northeast Program Evaluation Center (NEPEC). Percentages are rounded for clarity, so the actual calculated figure may be slightly different.

CHALENG 2004 Survey: VA Southern Arizona HCS - 678

#### **VISN 18**

#### A. Homeless Veteran Estimates

- 1. Point-in-time estimate of Homeless Veterans (from the CHALENG Point of Contact Survey): 250
- 2. Point-in-time estimate of Veterans who are Chronically Homeless: 48

The federal Interagency Council on Homelessness defines chronic homelessness as follows:

A person experiencing chronic homelessness is defined as an unaccompanied individual with a disabling condition who has been continuously homeless for a year or more or has experienced four or more episodes of homelessness over the last three years. A disabling condition is defined as a diagnosable substance abuse disorder, serious mental illness, developmental disability, or chronic physical illness or disability, including the co-occurrence of two or more of these conditions. Federal Register Vol. 70, No. 53, March 21, 2005, page 13588; http://www.hud.gov/offices/adm/grants/nofa05/gensec.pdf)

This veteran chronic homeless estimate is a conservative estimate. The following formula was used to obtain this estimate\*:

250 (point-in-time estimate of homeless veterans in service area)
X 27% (percentage of veterans served who indicate being homeless for a year or more at intake)
X 70% (percentage of veterans served who had a mental health or substance abuse disorder) = 48 (facility veteran chronic homeless estimate).

\*Note: point-in-time estimate of homeless veterans in service area comes from CHALENG POC survey. Percentage of veterans 'homeless 1 year or more' and 'mental health or substance abuse disorder' based on FY 2004 homeless veteran intake data provided by the VA Northeast Program Evaluation Center (NEPEC). Percentages are rounded for clarity, so the actual calculated figure may be slightly different.

Long-term, permanent housing	Continue developing relationships with local government housing to secure more permanent housing options. Build on success of current VA Supported Housing participants and work with city in acquiring more Section 8 vouchers. Continue to be active in local planning council's initiatives in developing plan towards ending area homelessness.
Dental Care	Continue efforts to increase case-managed clients who qualify for one-time VA care and work with our dental service to increase availability of services. Continue working with community agencies (El Rio, St. Elizabeth of Hungary, Hopefest) to allow vet referrals and increased level of services.
Transitional living facility	Continue close working relationship with community agencies (Comin' Home, Esperanza En Escalante, La Frontera, Primavera, etc.) to assist in finding additional funding resources for more transitional housing. Continue trying to obtain Shelter Plus beds for direct placement from VA Healthcare for Homeless Veterans program. Continue working on community relationships with half-way houses and correctional facilities to expand low-income options for clients requiring this level of housing.

CHALENG 2004 Survey: VAMC Phoenix, AZ - 644

#### **VISN 18**

#### A. Homeless Veteran Estimates

- 1. Point-in-time estimate of Homeless Veterans (from the CHALENG Point of Contact Survey): 3000
- 2. Point-in-time estimate of Veterans who are Chronically Homeless: 644

The federal Interagency Council on Homelessness defines chronic homelessness as follows:

A person experiencing chronic homelessness is defined as an unaccompanied individual with a disabling condition who has been continuously homeless for a year or more or has experienced four or more episodes of homelessness over the last three years. A disabling condition is defined as a diagnosable substance abuse disorder, serious mental illness, developmental disability, or chronic physical illness or disability, including the co-occurrence of two or more of these conditions. Federal Register Vol. 70, No. 53, March 21, 2005, page 13588; http://www.hud.gov/offices/adm/grants/nofa05/gensec.pdf)

This veteran chronic homeless estimate is a conservative estimate. The following formula was used to obtain this estimate\*:

**3000** (point-in-time estimate of homeless veterans in service area) **X 28%** (percentage of veterans served who indicate being homeless for a year or more at intake) **X 76%** (percentage of veterans served who had a mental health or substance abuse disorder) = **644** (facility veteran chronic homeless estimate).

\*Note: point-in-time estimate of homeless veterans in service area comes from CHALENG POC survey. Percentage of veterans 'homeless 1 year or more' and 'mental health or substance abuse disorder' based on FY 2004 homeless veteran intake data provided by the VA Northeast Program Evaluation Center (NEPEC). Percentages are rounded for clarity, so the actual calculated figure may be slightly different.
